

# PEDESTRIAN GRATES *with non-slip* ABRASIVE SURFACE FINISH

Patent Products Heel-Guard Pedestrian Grate, with specialised abrasive surface treatment applied to pre-galvanised pedestrian grating, is another endeavour to secure the best protection against the problem of slippery surfaces, particularly in wet conditions. This grating is ideal for applications in college or school grounds, swimming pool areas and places where there is a lot of pedestrian traffic. The grates are designed to carry car and light truck traffic and are available in one metre lengths or to order and a wide range of widths. Square and rectangular sump grates are also available. Standard surface finish is grey, with other colours to match decor made to order.

Recent installations include Roma Street Parklands, New Farm Power House complex, Brisbane City Council upgrade of Flinders Parade, Sandgate, Woodridge Railway Station, many schools and shopping complexes
